FCCC/SBI/2014/L.2

Framework Convention on Climate Change

Distr.: Limited
6 June 2014

Original: English

Subsidiary Body for Implementation
Fortieth session
Bonn, 4–15 June 2014

Agenda item 6(f)
Matters relating to the mechanisms under the Kyoto Protocol
Matters relating to the international transaction log under the Kyoto Protocol

Matters relating to the administrator of the international transaction log under the Kyoto Protocol

Draft conclusions proposed by the Chair

1. The Subsidiary Body for Implementation (SBI) continued its consideration of information security management in systems supporting emissions trading under the Kyoto Protocol. It welcomed the document prepared by the international transaction log (ITL) administrator and the Security Working Group under the Registry System Administrators Forum[1] and took note of the options for, and road map to, information security implementation in the registry system.

2. The SBI requested the ITL administrator and the Security Working Group to execute the further implementation option[2] by extending the current information security control implementation on the basis of a registry-specific and quantitative risk assessment, followed by an in-depth control implementation analysis. It also requested the ITL administrator and the Security Working Group to prepare a document containing a final implementation option for information security management, including the related resource requirements for registry systems and budget requirements for the ITL, for consideration at SBI 42 (June 2015).

3. The SBI agreed to consider the final implementation option referred to in paragraph 2 above at SBI 42, with a view to recommending a draft decision on the matter for consideration and adoption by the Conference of the Parties serving as the meeting of the Parties to the Kyoto Protocol at its eleventh session (November–December 2015).
